OBJECTIVE

Applied AI graduate student with a Computer Science background and experience building machine learning, computer vision, and deep learning solutions using Python. Passionate about applying data science to solve complex business problems and developing scalable, data-driven products.

HIGHLIGHTS OF QUALIFICATIONS

- Analyzed pipeline and campaign performance data (conversion rates, stage progression) to optimize prospecting strategy, contributing to \$400K+ in new revenue
- Completed Stanford's Machine Learning Specialization and Microsoft Azure AI Fundamentals certification
- Proficient in Power BI and Excel for data analysis and reporting; working knowledge of Python, SQL, and Git/GitHub
- Built full-lifecycle digital solutions (HTML/CSS/JavaScript) including ROI reporting for freelance clients
- Strong technical troubleshooting background (hardware/software/OS) from IT support and technician roles, translating to strong analytical problem-solving
- Bachelor of Arts in Computer Science with coursework in Data Structures, Algorithms, and Software Design

SKILLS

- Data & Analytics: Tableau (Desktop Specialist), Power BI, Excel (Pivot Tables, XLOOKUP), SQL, Python (Pandas, NumPy, scikit-learn)
- Python (Pandas, NumPy, scikit-learn)
- Excel (Pivot Tables, XLOOKUP, Charts)
- Libraries: OpenCV (computer vision), collaborative filtering, Data Analytics
- Web/Programming: JavaScript, HTML/CSS
- Version Control: Git/GitHub
- IT Support: Hardware/software troubleshooting, reimaging, Active Directory (basic), ticket-based support
- Operating Systems: Windows 10/11, basic Linux

EDUCATION/CERTIFICATION

Applied A.I. Solutions Development Post Graduate Program 05/2026 – 04/2027

George Brown Polytechnic-Toronto, Ontario

GPA: 3.92

Projects: Computer Vision, Recommenders, Big Data, Supervised and Unsupervised models.

Bachelor of Arts in Computer Science 2017 – 2022

York University- Toronto, Ontario

Tableau Desktop Specialist 08/2026

Salesforce

Microsoft Certifications 06/2022

AZ-900: Microsoft Azure Fundamentals, AI-900: Microsoft Azure AI Fundamentals

Machine Learning Specialization Certification 02/2025

Stanford Online

PROJECTS

Cold Email Response Prediction — Deep Learning Project (In Progress)

- Developing a deep learning model to predict the likelihood **that a recipient will respond** to cold outreach emails.
- Processing and analyzing text-based datasets to identify patterns influencing response probability.
- Using a relevant database from Hugging Face.

- Experimenting with neural network architectures and evaluation metrics to improve predictive performance.
- Version-controlled using Git.

Water Potability Prediction — Logistic Regression Classifier

- Preprocessed and validated scientific sensor data for machine learning applications.
- Trained and compared classification models, including Random Forest and Support Vector Machine.
- Evaluated models using **Accuracy, Precision, recall, and F1-score**.

Cartoon Face Filter — Real-Time Computer Vision

- Implemented a computer vision inference pipeline for real-time image processing.
- Built a real-time computer vision application using Python and OpenCV to detect faces via webcam and overlay cartoon graphics.
- Implemented face detection and tracking to maintain filter alignment across live video frames.
- Debugged performance bottlenecks independently to keep frame processing responsive in real time.

Movie Recommender System

- Built a content-based recommendation engine in Python that suggests films based on user-provided preferences, using similarity scoring across movie metadata
- Designed and implemented the recommendation logic independently, then validated suggestions against known user preferences
- Applied to a real-world dataset of movie titles, genres, and metadata to generate ranked recommendations

PROFESSIONAL EXPERIENCE

Business Development Team Lead

04/25 – 05/2026

Grenis Media- -present- Vaughan, Ontario

- Built data-driven prospecting workflows by analyzing CRM, trade show, and LinkedIn data to prioritize high-value accounts.
- Analyzed **pipeline performance** metrics (conversion rates, stage progression) to optimize prospecting strategies at scale.
- Communicated analytical insights to stakeholders, resulting in **\$400K+** in new revenue.

Systems Support Analyst

01/2024 – 01/2025

Clover (Fiserv)- North York, Ontario

- Supported internal systems and POS integrations for clients
- Analyzed system issues and collaborated with teams to resolve operational problems
- Created documentation and reports to support business and technical decisions

IT Support / Systems Technician

02/2021 – 11/2022

Sick Kids Foundation- Toronto, Ontario

- Reimaged and restored Windows operating systems across large volumes of computers
- Performed data backups and restorations to prevent data loss
- Installed and configured software applications and system settings
- Troubleshoot configuration and performance issues post-deployment
- Resolved support requests through ticket-based workflows while meeting response SLAs

Computer Technician (Internship)

09/2022 – 04/2023

Renewed Computer Technology - -- Mississauga, Ontario

- Diagnosed and resolved hardware and software issues on customer PCs and laptops
- Reimaged systems and installed Windows OS and required software
- Provided in-person technical support and explained solutions to non-technical users
- Documented recurring issues and resolutions to improve support efficiency

Sales Specialist

09/2018 – 02/2022

Fido - Richmond Hill Ontario

- Maintained **high feedback ratings** from customers by responding quickly to questions and problems.

Sales Associate

2016 – 2017

The Source -Richmond Hill, Ontario

- Exceeded sales goals and improved profitability by aligning sales strategies and business plans with market trends.
